[Edit](#)[Generator](#)[Documentation](#)[COMMUNICATION](#)[STATIC PARAMETERS](#)[MAPPABLE PARAMETERS](#)[INTERFACE](#)[SAMPLES](#)

Array of mappable parameters user can fill while configuring the module. Mappable parameters can contain variables from other modules. Parameters are accessible via `{{parameters.paramName}}`.

```
1  [  
2    {  
3      "name": "account_id",  
4      "type": "number",  
5      "label": "Account ID",  
6      "required": true  
7    },  
8    {  
9      "name": "company_id",  
10     "type": "number",  
11     "label": "Company ID",  
12     "required": false  
13   },  
14   {  
15     "name": "tracker_id",  
16     "type": "text",  
17     "label": "Tracker ID",  
18     "required": false  
19   }  
20 ]
```

[Edit](#)[Generator](#)[Documentation](#)[COMMUNICATION](#)[STATIC PARAMETERS](#)[MAPPABLE PARAMETERS](#)[INTERFACE](#)[SAMPLES](#)

Array of output variables. Same syntax as used for parameters.

```
1  [  
2    {  
3      "name": "id",  
4      "type": "uinteger",  
5      "label": "User ID"  
6    },  
7    {  
8      "name": "email",  
9      "type": "email",  
10     "label": "Email address"  
11   },  
12   {  
13     "name": "name",  
14     "type": "text",  
15     "label": "Name"  
16   },  
17   {  
18     "name": "created",  
19     "type": "date",  
20     "label": "Date created"  
21   }  
22 ]
```

Callrail

- BASE
- CONNECTIONS
- WEBHOOKS
- MODULES 3
- REMOTE PROCEDURES
- GROUPS
- README

Base structure all modules and remote procedures inherits from.

```
1 {
2   "baseUrl": "https://api.callrail.com/v3/a",
3   "log": {
4     "sanitize": ["request.headers.authorization"]
5   }
6 }
```

Common Data

Collection of common data accessible through `common.variable` expression. Contains sensitive information like API keys or API secrets. This collection is shared across all modules.

```
1 {}
```

Options

Available on invite-only basis	<input type="checkbox"/> OFF
Available for everyone	<div>Request Review</div>
App version	1.0.0

Invite users

To invite other users to use your app, enable the "Available on invite-only basis" option.
